

USS™ BLOWER PACKAGE

UNITED STATES SYSTEMS motor blower packages are built and assembled in our shop from premium materials and components that will exceed operating conditions for continuous service. Our blower packages are sized for optimum efficiency with capacity in excess of that requested. Quite simply, our motor/blower packages are better than the competition and cost no more than a cheaply built unit.

FEATURES :

- Capacities from 100 CFM to 2600 CFM
- 18 PSI and 17" Hg operation
- Quiet operations due to premium intake and discharge silencers
- High capacity intake filters
- Direct drives or belt drives with guards
- Sturdy, custom fabricated mounting tables field tested
- Configured for portable or fixed installations
- Air to air heat exchangers/after-coolers available
