## UNITED STATES SYSTEMS:

“BY FAR THE BEST PROOF IS EXPERIENCE”

-SIR FRANCIS BACON

### Pneumatic Conveyor Design and Manufacturing for Over 40 years!

United States Systems is celebrating its 40th year of building equipment for dry powdered and granular products including concrete, plastics, food, chemical, and other materials.

#### USS equipment includes:

- Pneumatic Conveyors
- Dust Collectors, Silos, and Bin Vents
- Unloading and Filling: Railcars, Trucks, and Bulk Bags
- Plus Accessories such as Tubing, Controls, Railcar Pans etc.

USS solves your problems with reliable equipment and through a philosophy we call Total System Responsibility.

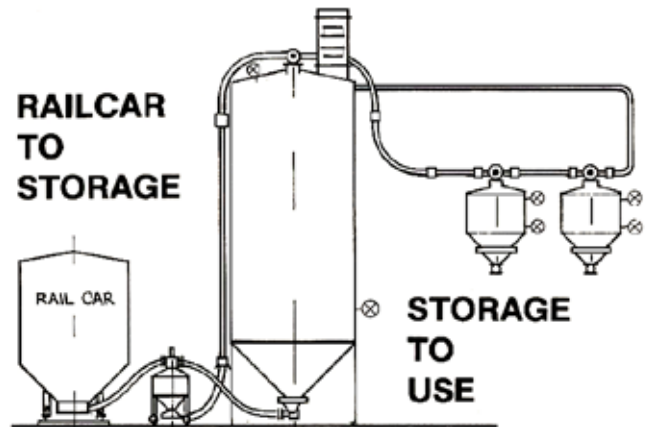

United States Systems' unique designs enable a single blower and USS Pot to perform multiple functions: unload & inplant conveying, thereby reducing capital costs.

What problems can USS help you solve? Does your plant need more reliable pneumatic conveying or dust control?

Put USS to work for you and we'll give you Total System Responsibility.

All types of in-plant transfers are supported:

- Silo discharging
- Baggers and bag dump stations
- Intermediate process transfers

#### Partial Materials List:

PVC Resin	Sugar	Cement
Nylon Chips	Flour	Flyash
Polyethylene Pellets	Salt	Calcined Alumina
Polystyrene Pellets	Starch	Sand
Pet Pellets	Coffee	Barite
PVC Compound	Groats	Gypsum
TiO <sub>2</sub>	Corn Meal	Perlite
Calcium Carbonate	Rice	Bentonite
